**We cannot save the world,  
but we can help to make it cleaner and more hygienic**

Finland is leading when it comes to professional cleaning.  
Already for decades Finnish academic studies are supporting modern cleaning and caused changing daily practice.  
Candidates have access to regular education program for cleaners up to the level of master degree

Cleaning systems are only acceptable when ergonomic, economic and hygienic.

Human being is getting more and more aware, about the importance of hygienic living circumstances and how important it is to respect environment.

Cleaning is contributing to this and Reflex Systems wants to contribute by being more innovative regarding these points.

**Reflex ProS Clip Mopping System**

The Reflex System contributes on environment by saving many m3 pure drinking water per cleaner and using less chemicals.

Contributes on ergonomics by being more efficient, light to operate, easy to use.

Contributes to hygiene for the cleaner (no touch principle) and to hygiene of users of the buildings.

Instruments and labor tests proof, that Reflex ProS clip Mopping System is taking out more dust and dirt than any other system and that it is improving the cleanness e.g. by resolving old layers that were left by less modern methods.

- saves many m3 valuable pure drinking water
- less chemical into the environment
- ergonomic and light, makes the job more pleasant to do.
- efficient and compact
- better cleaning results, more hygienic live circumstances

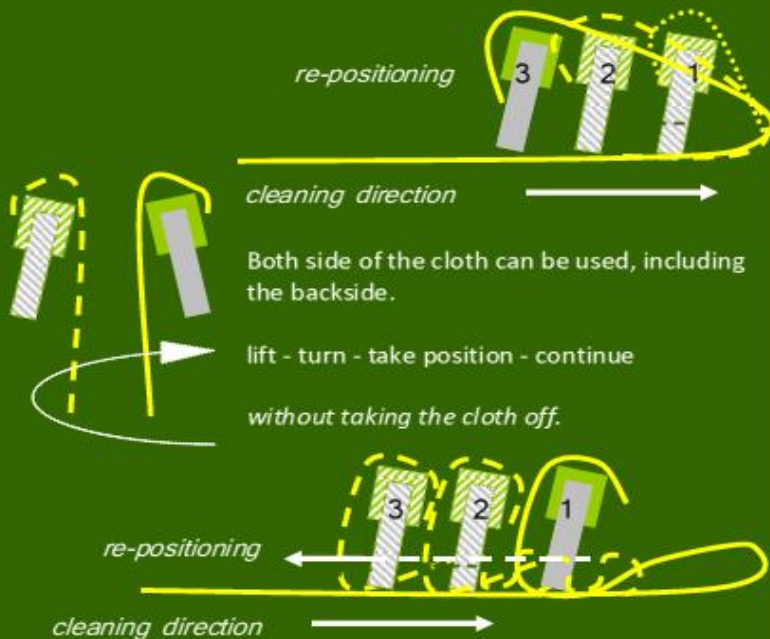

Reflex Mopping System is a swiveled tool, with special designed clips to attach a cloth to the squeegee.

The tool cleans where cloth and pressure of the squeegee come together, wiping the floor.

The rest of the cloth stays clean as it only touches cleaned surface.

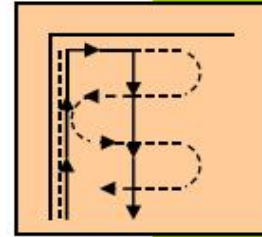

Once the pressure point becomes dirty, lift the squeegee and move the squeegee a. 1 cm towards the clean area. The dirty line is in front of the squeegee and a fresh line available to continue cleaning

In this way 80% of the cloth is used for cleaning larger area with the same cloth, but always a clean line

The swiveled squeegee with clips comes together with the Reflex telescopic handle. Ergonomic on the correct length, comfortable during cleaning.

Before cleaning extend the handle to the right length

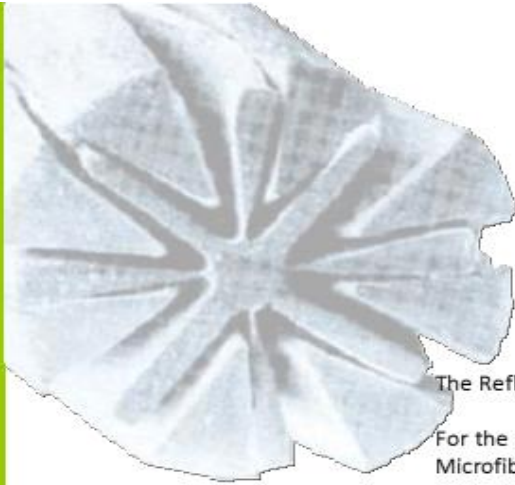

Computer studies proofed which is the most efficient and hygienic way to clean

Clean cloth always coming behind

The ergonomic grip feels comfortable  
The thermo-plest part prevents the pole for dropping

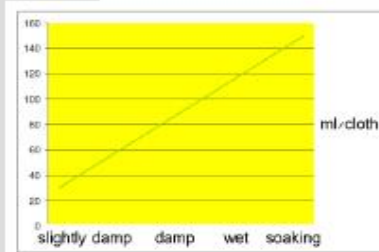

The Reflex Mopping System is a cloth-cleaning concept.

For the best results we developed the Reflex cloths made out of Super Microfiber 80% Polyester 20% Polyamide special span and woven for better absorption capacity

attracts and picks up smallest dust particles that directly affect our health, the waffle structure also takes the larger particles, so that it can be done all in one wipe only.

- Dry dusting
- Damp
- Wet

*It can be done all by the same system.*

When using damp or wet: the cloth can of course be put in a filled bucket and wringed it out by hand. The modern micro fibers also offer a more comfortable method.

Use a small bucket or plastic box that can be closed so that moisture cannot escape. Put the cloths you would like to prepare for cleaning, in the bucket or box.

Our cloths each easily can absorb 0- 1,5 dl water mixed with cleaning agent.

Pour the liquid on top of the cloths, close the bucket or box, leave the cloths for a few minutes:

*the cloths are now ready for use*

all equally moistened.

Modern flooring e.g. laminate and wooden floors need to be cleaned less wet.

No problem thanks to the Reflex Super Micro fiber cloths, adaptable and all equally moistened to the floor conditions

# Specifications:

	Color	Dimensions	Package	Product Code
Reflex ProS Squeegee	–	20"	–	06-0010
Reflex ProTool H Telescopic Handle	–	40 / 70"	–	06-0020
Reflex ProTex Ultra Micro Fiber *	Green	22 × 10"	10 pack	08-0155D
Reflex ProTex Abrasive Micro Fiber	Blue	22 × 10"	5 pack	08-7050
Reflex Belt Bag	Blue / Gray	–	1 pack	07-90011
Reflex Duster	–	–	1 pack	08-90002
Waterproof Mop Bag	Blue / Gray	–	1 pack	07-90031
Mesh Bag	Black	–	1 pack	07-90040

**\* 4 color coded tabs can be used towards Leeds certification.**
